Subject: RE: Bryston BDP player and DAC

Hi Bryston

"I have been a techi for most of my life...I have been an audiophile for the last 10 years...I remember paying tens of thousands of dollars for transports and CD players.

After the digital media explosion occurred, it was possible to listen to music without CD's; i.e., internet, hard drive, PC's, etc...since then, I have tried all kinds of media products to replicate the same sound my old expensive CD players were capable of.

Most of these consumer products were ok, but not audiophile quality, until now...**the BDP-1 player is an awesome product**...it is the first product that I came across that does what I need. I am sure there are other products like it out there, but they are much more expensive and maybe not as good. This BDP-1 unit is easy to use, dead silent and very versatile.

Once you use the BDP-1, there is no going back. So I would like to congratulate Bryston for making such a terrific product."

Good luck

Leon
