## A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: BDP-1 Player and SP-3 Processor - UK Customer Feedback

DATE: July 2012

Hello James

I have just bought a Bryston BDP1 Player and SP3 Processor combination.

The sound is Scary!!! I am in a state of disbelief.

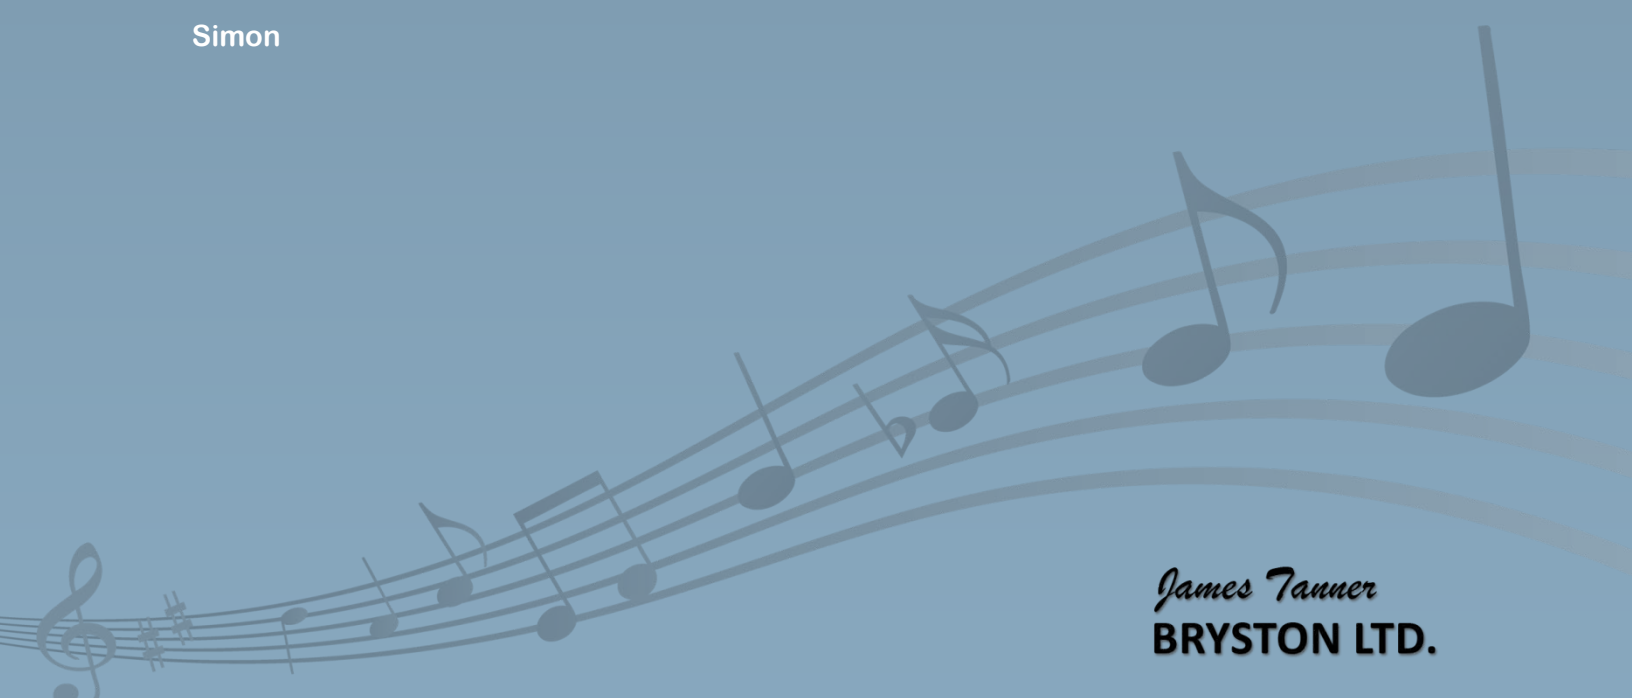

I keep setting it tasks to see if it's as good as my previous system whether it be vinyl through Phono amp to CD – (yeah I know but allow me some indulgence to my personal favourite SACD and DVD audio).

Wow it just does it simply no fuss which throws you a little because on the previous top of the range Onkyo you had all these settings to play with, With the Bryson SP-3 it just does it and boy does it do it! Can I temp you James to throw on Band on the run DVD audio and just try and take that smile of your face.

And of course my new little friend The BDP1 Digital Player is sounding as good if not better than the others I have mentioned here. just getting to grips with my new world FLAC Lossless 44khz 24/96 once I get comfortable with these new concepts I will be one happy bunny rabbit

Keep up the Good Work

Simon
