MEMO: Customer Feedback Bryston Model T Loudspeakers

Re: Bryston Loudspeakers

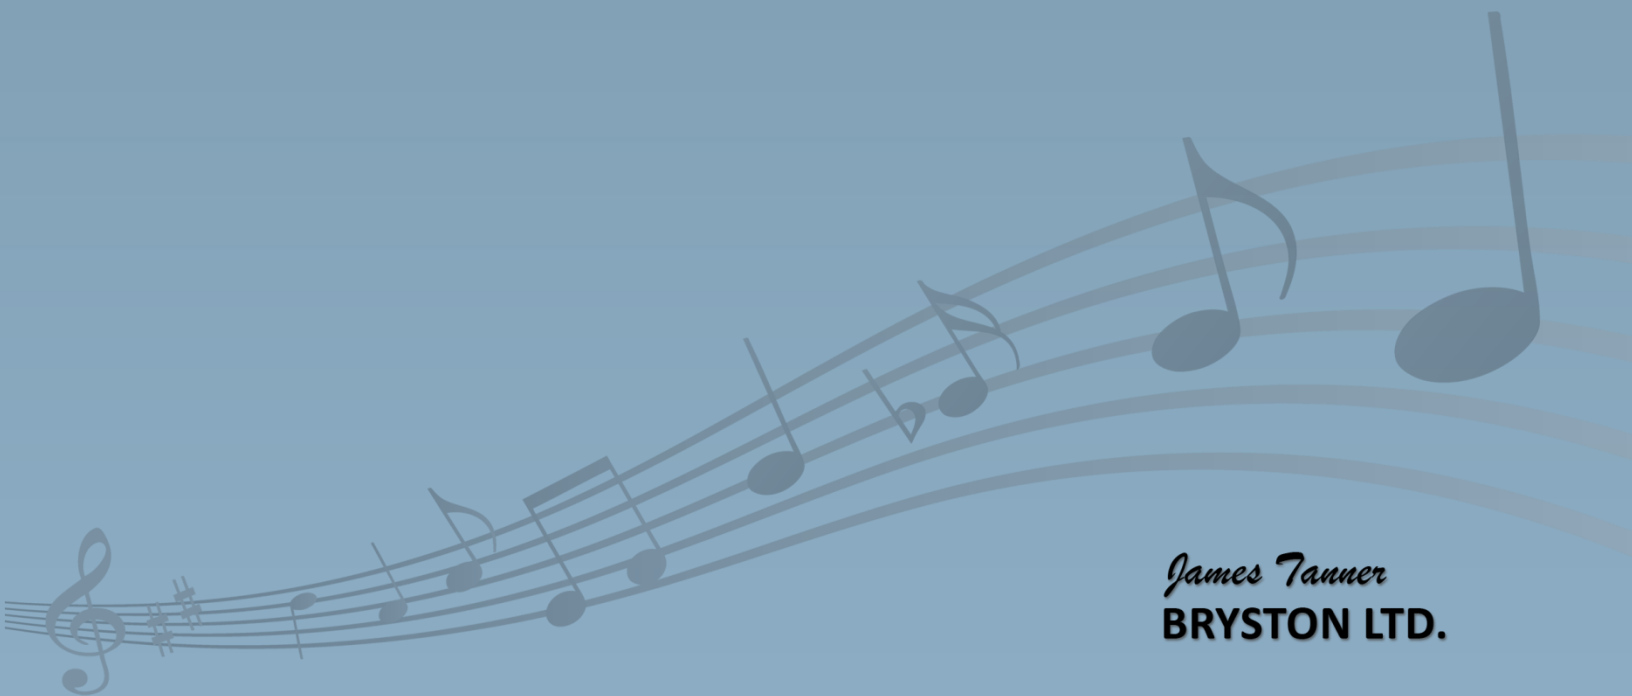

James,

Great demo of the Model T at Audio-One today. Nicely balanced, good bass and incredible dynamics. Physically bigger than I thought they would be, I liked the outriggers.

I could really tell the difference when you played a song with some (not even a huge amount of) compression, I do not recall hearing a speaker that had the same dynamics. For future demos you may want to have a few tracks that are heavily compressed to highlight how bad some of the recordings are today and to show off the dynamics when you switch to a song with less compression.

I was impressed.

Jeff
