**“Hi James**

**I heard the Model T at HiFi Centre the other day. They had them running on a new 4B a 26B pre amp and a Linn cd player with a digital out to your BDA-2 DAC**

**Pure Magic !!!**

**I plan to buy a new pair from that HiFi Center before the years end. What an amazing pair of speakers. I don't understand how a company that doesn't make speakers hits a home run like this on the first go around.**

**Were you involved in the design?"**

**Hi Robert**

**Yes I spent about 2 years trying different drivers and cabinets etc. and finally arrived at what you hear now.**

**I think I have owned every speaker there is to own over the many decades I have been doing this and I really knew what I wanted the speaker to have - huge dispersion and no dynamic compression at a state of the art level but at prices mere mortals could afford!.**
