**SUBJECT: Bryston A2 Speaker – Dealer Feedback**

August, 2015

Hey James,

Well I finally got to un-boxing the A2's.

These are some "seriously" good speakers!

From the first 30 seconds with these guys, I could tell right away that they are a crazy great speaker at their price level. They simply retain soooo much of the qualities of the bigger, and much more expensive, Model T's. The lack of dynamic compression, which is typical for a speaker at this price point, just makes the A2's a blast to listen to.

A have a list of about 20 songs that I use to evaluate all my speakers. Besides the usual "sitting in the sweet spot" and critically listening, I also play this list (thanks to a BDP-2) while I am working in my office, just down a little hall.

I know a speaker is a good one when I am forced to stop whatever paper/computer work I am doing and walk into the demo room to hear that I was hearing in the office. With the A2's, I did that with every damn song on my playlist.

Well done!
