

BRYSTON

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston 28B Cubed – Customer Feedback

September, 2017

“Good morning James,

Got the Bryston 28B Cubed amplifiers as planned and after a quick set-up, I had a first listen yesterday: OMG!

To be honest with you I did not expect a so big difference and instead of speaking within the regular terms employed in audio I will say:

Everything seems Soooooo easy now!

I have only tried my Pyramid speakers at this moment because one loudspeaker of my other pair is apart to begin the external cross over project but I do not have any doubt that these amplifiers will drive any speaker with ease.

Like I do with everything I purchase, I took a quick look inside the amp and was very impressed by the simplicity and build quality, very, very good engineering inside! I also found the binding posts really nice.

I am already thinking of going active with a Bryston BAX-1 Digital Crossover.

Well I will stop right now bothering you with all my questions and wish you a very good day! I will do my best to be present at the TAVES in October and met you there if possible.”

**Regards,
Louis**
